Benefits:

Auto mat cleaners are devices specifically designed to clean automotive floor mats. These cleaners are typically portable and handheld, allowing users to easily remove dirt, dust, stains, and other debris from their car mats.

Auto mat cleaners often come with various features and attachments to effectively clean different types of mats. They may include rotating brushes or scrubbing pads to agitate the surface of the mat and loosen dirt particles. Some cleaners also have built-in suction capabilities to remove the loosened dirt and water from the mat.

Remove the floor mats from your vehicle and shake off any loose dirt or debris.

Attach the appropriate cleaning attachment or brush to the cleaner, if applicable.

Apply a suitable cleaning solution or carpet cleaner to the mat, following the manufacturer's instructions.

Turn on the cleaner and move it over the surface of the mat in a back-and-forth or circular motion, applying gentle pressure.

If the cleaner has a suction feature, it will simultaneously remove the dirt and excess moisture from the mat. Otherwise, you may need to blot the mat with a clean cloth or towel to absorb any excess moisture.

Repeat the process if necessary or until the mat is clean to your satisfaction.

Allow the mats to dry completely before placing them back in your vehicle.

Packing & Delivery

To better ensure the safety of your goods, professional, environmentally friendly, convenient and efficient packaging services will be provided.
