

## Electrical High Pressure Washer 2.2kw 3kw 4kw 5.5kw 7.5kw

Our Product Introduction

### Basic Information

- Place of Origin: Shanghai, China
- Brand Name: Kolon
- Certification: CE
- Model Number: ZM1016A
- Minimum Order Quantity: 1 unit
- Price: USD360-USD460
- Packaging Details: canton package
- Delivery Time: 10 days
- Payment Terms: D/P, D/A, L/C, T/T, Western Union, MoneyGram
- Supply Ability: 1000unit per year

### Product Specification

- Product Name: Automatic High Pressure Washer
- Brand Name: Kolon
- Carton Measurement: 65\*51.5\*55mm
- Matching Power: 2.2KW
- Gross Weight Of Equipment: 62.5kg
- Net Weight: 51kg
- Color: Customer's Request, Blue, Yellow Blue Purple RED, Pictured Or Custom Color, Yellow
- Motor Speed: 1450 R.p.m
- Max Pressure: 1450Psi/100Bar
- Max Flow: 4.3gpm/16lpm
- Models Of Pump Matched: ZM1610CF1
- Type: Automatic High Pressure Washer
- Feature: Maintenance And Cleaning, Time-

ZM-1716A	4.0KW	380V	1450r.p.m	2465psi/170bar	4.3gpm/16lpm	ZM1617CF1	57KG	68.5KG	65x55x1.55cm

**Hot Sale Automatic high pressure washer**

**ZM-1016A****4大功能 FUNCTIONS**

漏油保护 Leakage protection  
 过载保护 Over load protection  
 延时关机 Delay shutdown  
 关机停枪 Shutdown gun

**适用范围 APPLICATION**

大中型洗车场, 物业小区清洗 Car washing store  
 汽车4S店, 洗车美容清洗 Auto 4s shops, automotive beauty shops washing  
 建筑物外墙, 浴池, 游泳池清洗 Facades, bath, swimming pool cleaning  
 食品加工厂, 养殖场, 机械设施清洗 Food processing plants, farms, mechanical equipments cleaning

**产品特点 PRODUCT FEATURE**

电机质保2年(无缺相) 2 Years guarantee for the motor(No lack of phase)  
 耐用耐用四极铝壳电机(国标) Durable four-pole aluminum housing GB standard motor with safeguard of over loading  
 实心耐腐蚀性好喷枪(陶瓷) Solid stainless steel spayed porcelain plunger with heat treatment  
 超过60分钟不开机, 自动切断电源 Auto cut off power when over 60 mins no working  
 本机可连续24小时工作 Then machine can 24 hours continuous working

a.Over vantage protection

b.Over temperature protection

c.Pressure relief protection

d.Protection against dry heating

e.Boiler excessive water protection

f.Water tank out of water protection

**Advantages:**

**Powerful Cleaning:** High-pressure washers deliver a strong and concentrated stream of water at high pressure, which provides effective cleaning power. The force of the water can remove stubborn dirt, grease, and stains from surfaces more efficiently than traditional cleaning methods.

**Time-Saving:** High-pressure washers can clean large areas quickly, saving you time and effort compared to manual scrubbing or using regular garden hoses. The high-pressure water stream can cover a larger surface area and penetrate into crevices and hard-to-reach areas, resulting in faster and more thorough cleaning.

**Versatility:** High-pressure washers can be used on a wide range of surfaces, including driveways, decks, patios, sidewalks, fences, vehicles, outdoor furniture, and more. They are effective for cleaning different materials such as concrete, wood, metal, and plastic. The adjustable pressure settings allow you to customize the cleaning intensity for different surfaces and tasks.

**Deep Cleaning:** The high-pressure water stream from a pressure washer can penetrate deep into surfaces, removing ingrained dirt, algae, moss, and mildew. It can rejuvenate the appearance of surfaces, making them look cleaner and more vibrant.

**Efficient Water Usage:** High-pressure washers use less water compared to traditional cleaning methods. The high pressure helps to dislodge dirt and grime, requiring less water to achieve effective cleaning results. This makes pressure washers more water-efficient and environmentally friendly.

**Easy Operation:** High-pressure washers are designed for user-friendly operation. They typically come with adjustable nozzles or spray wands that allow you to control the water pressure and spray pattern. Some models may also have detergent tanks for applying cleaning solutions. The compact and portable design of pressure washers makes them easy to maneuver and store.

**Versatile Accessories:** Pressure washers often come with a variety of accessories and attachments to enhance their cleaning capabilities. These may include surface cleaners for large flat areas, extension wands for reaching high or distant surfaces, and brushes for scrubbing stubborn stains. These accessories make pressure washers suitable for a wide range of cleaning tasks.

**Maintenance and Restoration:** High-pressure washers are useful for maintaining and restoring the appearance of outdoor surfaces. They can remove built-up dirt, grime, and discoloration, helping to extend the lifespan of surfaces such as decks, driveways, and fences.

**Note: Pls change the engine oil after 100 hours for first use (3 months), engine oil No.: 15W-40.**

**Warranty:**

We offer 2year extended warranty for complete machine, all spare parts included.

Within 2 year:if any parts break down, we will compensate new parts at free charge,not including courier expense. Normally we will ask customers keep some spare parts in stock for machine maintenance, and the compensation spare parts will be sent together with next shipment or through a cheaper way but not by DHL.

More than 2 year:We provide online technical guidance and introduction to find broken part,and we will give you a favorable price,but need you bear shipping cost.

**FAQ:**

**Q: What is an auto high-pressure washer?**

A: An auto high-pressure washer is a type of pressure washer specifically designed for automotive cleaning. It uses high-pressure water to remove dirt, grime, and other contaminants from vehicles, including cars, trucks, motorcycles, and bicycles.

**Q: How does an auto high-pressure washer work?**

A: Auto high-pressure washers work by pressurizing water and then forcing it through a nozzle or spray gun at high velocity. The high-pressure water stream effectively removes dirt, mud, and other debris from the vehicle's exterior surfaces.

**Q: Can I use an auto high-pressure washer on all parts of my vehicle?**

A: While auto high-pressure washers are generally safe for cleaning the exterior surfaces of vehicles, there are some parts you should avoid spraying directly with high-pressure water. These include the engine bay, electrical components, sensitive sensors, and certain delicate parts of the vehicle. It's best to refer to the manufacturer's guidelines or consult a professional for specific instructions on using the high-pressure washer on your vehicle.

**Q: Are auto high-pressure washers safe for the vehicle's paint?**

A: Auto high-pressure washers are generally safe for the vehicle's paint if used correctly. However, it's important to use the appropriate pressure setting and maintain a safe distance from the surface to prevent damage. Additionally, it's recommended to use a nozzle or attachment specifically designed for auto cleaning to ensure a gentle and even water spray.

**Q: Can I use detergent or soap with an auto high-pressure washer?**

A: Yes, many auto high-pressure washers have detergent tanks or detergent injection systems that allow you to apply soap or specialized cleaning solutions to the vehicle's surface. Using a suitable automotive detergent can help enhance the cleaning power and remove tough stains or grime. Always follow the manufacturer's instructions for the proper use of detergents.
