CAR WASH MACHINE

### Product Specification

- Product Name: Car Wash Detergent
- Brand Name: KOLON
- Function: Waterless Wash Wax
- Logo: Customized Logo
- Surface Treatment: Sample Color
- Packing: Plastic Bottle
- Application: Auto Repair Shops, car Wash Machine Location, workshop
- Place Of Origin: Shanghai, China
- Feature: Eco-friendly
- Product Type: Cleaner & Wash
- Usage: Car/bus Cleaner
- Bucket Material: PP(Polypropylene)
- Expiration Date: 3 Years
- Weight: 20Kg

## Product Description

### Car wash wax

Wax use GERMANY new type high technology to reduce car paint tension and dynamic angle to get rid of water on car body and no white spot on car surface

#### ALL COSTS

With many years experience in manufacturing car wash equipments, SINO STAR knows how to maximum reduce operators' cost. Simple integration design and high quality materials save operators' maintenance cost.

#### EARN PROFIT

Our products improves the touchless washing standard, enhance customers' revenue and optimize use-cost and offers maximum rate of return on investment. Intelligent 360 wash technology improves the dynamic response capability in the wash areas to achieve self thinking ability, reduce the washing time and gains the maximum profit in the shortest time.

#### MORE COMPREHENSIVE FUNCTION

Our products has prewashing system for clean mosquito bodies on car heads. High efficiency 22kw built-in drying system can dry 96% water. 360 wash technology arm cleans car surface without dead corners. Pressure adjustable valves can reduce the waste of water and chemicals and offer the best wash process for every car.

**Specification:**

item	value
Type	Cleaner & Wash
Brand Name	KOLON
Weight	20kg
Use	Car cleaner
Function	Waterless Wash Wax
Usage	Car/bus cleaner
Logo	Customized logo
Expiration Date	3 years

Using a car wash detergent with your high-pressure washer or during manual car washing offers several advantages:

**Enhanced Cleaning Power:** Car wash detergents are specifically formulated to break down and remove dirt, grime, road tar, bugs, and other stubborn contaminants from the vehicle's surface. They contain active ingredients that help loosen and lift the dirt, making it easier to rinse away.

**Gentle on Paint:** Car wash detergents are designed to be gentle on automotive paint finishes. They typically have a pH-balanced formula that is less likely to strip away wax or damage the clear coat. Using a car wash detergent helps maintain the integrity and shine of your vehicle's paint.

**Spot-Free Rinse:** Many car wash detergents are formulated to provide a spot-free rinse. They contain ingredients that help prevent water spots and streaks from forming on the vehicle's surface when it dries. This results in a cleaner and more polished finish.

**Safe for Exterior Surfaces:** Car wash detergents are safe to use on a variety of exterior surfaces, including paint, glass, plastic, and chrome. They are formulated to be non-abrasive and non-corrosive, reducing the risk of causing damage to your vehicle's surfaces.

**Lubrication and Protection:** Some car wash detergents contain lubricating agents that help reduce friction between the wash mitt or sponge and the vehicle's surface. This added lubrication helps prevent scratching or marring the paint during the washing process. Additionally, certain detergents may have protective additives that leave a thin layer of wax or polymer on the surface, providing some level of protection and shine.

**Easy Rinsing:** Car wash detergents are designed to rinse off easily, leaving no residue behind. This makes the rinsing process quicker and more efficient, saving you time and effort during the car washing process.

**Versatility:** Car wash detergents can be used with various washing methods, including hand washing, foam cannons, and high-pressure washers. They are compatible with different application techniques and equipment, allowing you to choose the method that suits your preference and convenience.

**Pleasant Fragrance:** Many car wash detergents have pleasant fragrances that can leave your vehicle smelling fresh and clean after the wash.

#### **Q&A:**

##### **Q:What is car wash detergent?**

A:Car wash detergent is a specialized cleaning solution designed specifically for washing cars. It is formulated to remove dirt, grime, road film, and other contaminants from the vehicle's exterior surfaces effectively.

##### **Q:How is car wash detergent different from regular soap?**

A:Car wash detergent is specifically designed for automotive use and differs from regular soap in several ways. It is formulated to be pH balanced, which means it is gentle on the vehicle's paintwork and won't strip away protective coatings. Car wash detergents also often contain lubricating agents that help minimize the risk of scratching or swirling the paint surface.

##### **Q:How should I use car wash detergent?**

A:Follow the instructions provided on the car wash detergent's packaging for the recommended dilution ratio and usage guidelines. Typically, you mix the detergent with water in a bucket or foam cannon, then apply it to the vehicle's exterior using a sponge, mitt, or soft brush. Thoroughly rinse the vehicle after washing to remove all traces of the detergent.
