7 brush rollover car wash machine fully automatic system/car washing equipment for car wash station

Product Description:

With a power requirement of 380v/20.5Kw, this car wash machine is efficient and powerful enough to provide a thorough cleaning of your vehicle. The air pressure of the machine ranges from 2-5 BAR, making it ideal for washing cars of different sizes and models.

The Rollover Car Wash Machine comes with a range of features that make it the perfect choice for car washing businesses. The foam spraying feature ensures that your vehicle is cleaned thoroughly, while the wheel brushing feature makes it easy to clean the wheels and rims of your car.

The undercarriage washing feature is another useful function of this car wash machine. It ensures that the undercarriage of your vehicle is properly cleaned, removing all dirt and debris that may have accumulated there. This feature is particularly useful for cars that have been driven in muddy or dusty conditions.

Another important feature of this car wash machine is its water consumption. With a water consumption of 80L/car-100L/car, you can be sure that your water bills will not skyrocket after investing in this machine.

To summarize, the Rollover Car Wash Machine is an excellent choice for car washing businesses that want an efficient and effective way to clean vehicles. It is made of high-quality stainless steel material and comes with a range of features, including foam spraying, wheel brushing, and undercarriage washing. With a power requirement of 380v/20.5Kw and an air pressure range of 2-5 BAR, this car wash machine is powerful enough to clean cars of different sizes and models. Its water consumption is also low, making it an eco-friendly choice for car washing businesses.

| Size | Standard |
| Air Pressure | 2-5 BAR |
| Washing Time | 15cars/hour |
| Brush Quantity | 7 |
| Drying Method | Hot Air Blower |

Applications:

KOLON KL-7VF Rollover Car Wash Machine is an automatic car washing machine that is designed to provide efficient and reliable vehicle washing system for various occasions and scenarios. The machine is manufactured in Shanghai, China and is equipped with powerful components that make it capable of delivering excellent washing results.

The KOLON KL-7VF Rollover Car Wash Machine has a power requirement of 380v/20.5Kw and frequency of 50Hz, which makes it suitable for use in industrial and commercial settings. The machine consumes between 100-150 liters of water per car, which ensures that it is water-efficient and environmentally friendly. The washing system of the machine is based on water spraying, which ensures that the car is thoroughly cleaned and all dirt and grime are removed.

The KOLON KL-7VF Rollover Car Wash Machine comes equipped with advanced features such as foam spraying, wheel brushing, and undercarriage washing, which enable it to provide a comprehensive cleaning solution for all types of vehicles. The foam spraying feature allows the machine to apply a layer of foam on the car, which helps to loosen dirt and grime, while the wheel brushing feature ensures that the wheels are thoroughly cleaned. The undercarriage washing feature is designed to clean the underside of the car, which is often neglected in other car washing systems.

The KOLON KL-7VF Rollover Car Wash Machine is ideal for use in various occasions and scenarios, including car dealerships, car rental companies, gas stations, and car wash centers. Its automatic car washing machine design makes it easy to use, and it can be operated by a single individual. The machine is also suitable for use in busy locations where there is a high volume of vehicles that require cleaning, and its fast and efficient washing process ensures that cars are washed quickly and thoroughly.

In summary, the KOLON KL-7VF Rollover Car Wash Machine is an excellent vehicle washing system that is suitable for use in various occasions and scenarios. Its powerful components, advanced features, and efficient washing system make it a reliable and effective solution for car washing needs.

Customization:

Made in Shanghai, China, the KOLON KL-7VF boasts a water spraying washing system that is capable of producing 2-5 BAR air pressure. It also features 7 brushes, allowing for a thorough and complete clean for each vehicle that passes through.

But the KL-7VF doesn't stop there. It also comes equipped with foam spraying, wheel brushing, and undercarriage washing capabilities, making it a versatile and comprehensive roll over auto detailer.
