Product Description

Product Description:

The KL-BS2 is a powerful Truck and Bus Pressure Washer that uses water pressure of 0.3-0.5MPa to clean your buses quickly and efficiently. The machine is equipped with a powerful 67kw motor that ensures a thorough clean every time. The high-pressure water stream of this machine can remove even the toughest dirt and grime, leaving your buses spotless and looking brand new.

Not only is the KL-BS2 effective in cleaning buses, but it is also incredibly efficient. With a Water Consumption of only 80L/car, this machine is an eco-friendly option that helps conserve water, while still providing a thorough clean. The machine is equipped with advanced water-saving technology that ensures that only the required amount of water is used during the cleaning process, making it an ideal choice for businesses that are conscious about their environmental impact.

Our Automatic Bus Cleaning Machine is easy to use and requires minimal manual intervention. The machine is fully automated, which means that once the bus is positioned in the washing area, the machine takes over and cleans the bus from top to bottom. The controls of the machine are user-friendly and can be easily operated by anyone. Moreover, the machine is designed to be low maintenance, which means that it requires minimal upkeep and can be used for years to come.

In summary, the KL-BS2 is a powerful, efficient, and eco-friendly solution for all your bus cleaning needs. Whether you are a bus operator or a municipal authority looking for a reliable and efficient way to clean your buses, the KL-BS2 is the perfect choice for you. So why wait? Get your hands on our top-of-the-line Automatic Bus Cleaning Machine today and experience the difference for yourself!

Features:

Product Name: Bus Wash Machine

Water Consumption: 80L/car

Control System: PLC

Model: KL-BS2

Washing Speed: 5-7 Buses/hour

Water Pressure: 0.3-0.5MPa

This Bus Wash Machine is an Automatic Bus Cleaning Machine that is perfect for Municipal Bus Cleaning System. With a model number of KL-EN1, this Truck and Bus Pressure Washer is equipped with a PLC control system. It consumes 80L of water per car and has a washing speed of 5-7 Buses/hour. The water pressure ranges from 0.3-0.5MPa.

Technical Parameters:

Model	KL-BS2
Washing Time	3-5mins/car
Cleaning Speed	2-3min/car
Power Source	Electric
Control System	PLC
Drying Time	1-2 Minutes
Water Pressure	0.3-0.5MPa
Safety Features	Emergency Stop Button
Max Washing Length	Unlimited
Frequency	50Hz

Applications:

The KL-BS1 is designed to be easy to use and highly effective, with a range of features that make it ideal for a variety of different occasions and scenarios. Whether you're running a large transport company with a fleet of buses, or you're a municipal authority looking to keep your city's public transport system clean and well-maintained, the KL-BS1 has what you need to get the job done quickly and efficiently.

Some of the key features of the KL-BS1 include its powerful 67kw motor, which provides more than enough power to clean even the dirtiest of buses or trucks. The machine is also equipped with a PLC control system, which makes it easy to operate and ensures that it runs smoothly and reliably every time.

In addition to its power and ease of use, the KL-BS1 is also highly versatile, with a cleaning speed of 2-3min/car that makes it ideal for a wide range of different applications. Whether you're looking to clean a single bus or a fleet of trucks, this machine has the power and efficiency you need to get the job done quickly and easily.

So if you're looking for a high-quality, reliable and efficient big vehicle washing equipment, look no further than the KOLON KL-BS1 Bus Wash Machine. Whether you're cleaning buses, trucks, or any other type of large vehicle, this powerful and versatile automatic bus cleaning machine is the perfect solution for your needs.
