

50Hz Electric Powered Bus Wash System with 3-5mins/Car Washing Time

Basic Information

- Place of Origin: Shanghai, China
- Brand Name: KOLON
- Model Number: KL-BS1

Product Specification

- Frequency: 50Hz
- Water Pressure: 0.3-0.5MPa
- Max Washing Length: Unlimited
- Cleaning Speed: 2-3min/car
- Safety Features: Emergency Stop Button
- Drying Time: 1-2 Minutes
- Power: 67kw
- Washing Time: 3-5mins/car
- Highlight: **5mins/Car Bus Wash System,
50Hz Electric Powered Bus Wash System**

Product Description

Product Description:

With a frequency of 50Hz, our bus wash machine can handle high-volume cleaning operations with ease. It is equipped with a powerful 67kw motor that drives the cleaning brushes and sprays, ensuring that every nook and cranny of your buses is thoroughly cleaned. Safety is a top priority in our bus wash machine, and we have integrated an emergency stop button that can be easily accessed in case of any unforeseen circumstances. This ensures that your employees and buses are always safe during the cleaning process. Our Municipal Bus Cleaning System is designed to be eco-friendly, with a water consumption rate of only 80L per bus. This ensures that you can achieve a high level of cleanliness while minimizing water wastage and helping to protect the environment. One of the standout features of our bus wash machine is its unlimited washing length. This means that it can accommodate buses of any size, making it a versatile solution for any municipal bus cleaning needs. The Municipal Bus Cleaning System is a reliable and durable solution that is built to last. With regular maintenance and cleaning, it can provide years of trouble-free operation, ensuring that your buses are always clean and well-maintained. Overall, our Municipal Bus Cleaning System is a must-have solution for any organization that needs to maintain a fleet of municipal buses. It is a powerful and efficient cleaning machine that can save you time and money while ensuring that your buses are always in top condition.

Features:

Product Name: Bus Wash Machine

Model: KL-EN1

Water Consumption: 80L/car

Drying Time: 1-2 Minutes

Frequency: 50Hz

Water Consumption: 267L/car

Our Automatic Bus Cleaning Machine, also known as a Truck and Bus Pressure Washer, is the perfect Big Vehicle Washing Equipment for your fleet. With a water consumption of only 80L per car, our Bus Wash Machine is efficient and cost-effective. Plus, with a drying time of only 1-2 minutes and a frequency of 50Hz, you can get your vehicles cleaned in no time.

Applications:

The KL-BS1 is a versatile and user-friendly machine that can be used in different scenarios. It can be used in bus and truck depots, transport companies, and other commercial vehicle maintenance centers. The machine can clean all types of buses and trucks, regardless of their size and shape. It is also a perfect fit for public transport companies, airports, and other facilities where large vehicles require regular cleaning.

The KOLON KL-BS1 is designed to be highly effective in removing dirt, grease, and grime from the surface of vehicles. The machine can operate at high pressure, providing a deep and thorough clean. It is equipped with advanced cleaning technology that ensures efficient cleaning without damaging the vehicle's surface.

The KL-BS1 is a cost-effective solution for big vehicle washing equipment. It saves time and reduces labor costs, making it an ideal investment for transport companies and bus depots. The machine can also be used in car wash centers that offer cleaning services for buses and trucks.

The KL-BS1 is an eco-friendly product that helps conserve water. Its water consumption rate is lower than other pressure washers, which makes it an ideal choice for companies that prioritize sustainability. The model KL-EN1 is equipped with a drying feature that takes only 1-

2 minutes, making it perfect for facilities that require quick turnaround times.

Customization:

Support and Services:

The Bus Wash Machine is a high-quality product that is designed to efficiently and effectively clean buses and other large vehicles. We offer a range of technical support and services to ensure that your machine operates smoothly and reliably.

Our team of experienced technicians is available to provide phone support and troubleshooting assistance to help you diagnose and resolve any issues that may arise with your Bus Wash Machine. We also offer remote support services to help you optimize your machine's performance and ensure that it is operating at peak efficiency.

In addition to technical support, we offer a range of services to help you maintain your Bus Wash Machine and keep it operating at its best. These services include regular maintenance and cleaning, as well as repair and replacement of any worn or damaged parts.

At Bus Wash Machine, we are committed to providing our customers with the highest level of support and service. Whether you are a new customer or a long-time user of our products, we are here to help you get the most out of your Bus Wash Machine.
