

## Kolon 4 Steps Water Treatment 10 M3 Water Treatment Solution For Professional Sewage Purification

Our Product Introduction

For more products please visit us on [automaticcarwashing.com](http://automaticcarwashing.com)

### Basic Information

- Place of Origin: Shanghai, China
- Brand Name: KOLON
- Model Number: YPE-4

### Product Specification

- Color: Silver; customer's Request
- Core Components: Motor, PLC
- Maintenance: Easy To Maintain And Operate
- Operating Temperature: 5-40
- Machinery Test Report: Provided
- Treatment Stage: Primary, Secondary, And Tertiary Treatment
- Warranty: 1 Year
- Capacity: 5000 M3/day
- Highlight: **Professional Sewage Purification Water Treatment Solution**  
**, 10 M3 Water Treatment Solution**

### Kolon 4 steps water treatment 10 M3 Water Treatment Solution For Professional Sewage Purification

#### Product Description:

Featuring primary, secondary, and tertiary treatment stages, this system is designed to provide thorough treatment of wastewater, ensuring that it is safe for discharge or reuse. The primary treatment stage involves the removal of large solids and other materials, while the secondary treatment stage uses a biochemical process to remove organic matter and pollutants. The tertiary treatment stage provides further purification, ensuring that the water is safe for reuse or discharge.

The Waste Water Treatment System is an excellent investment for industrial facilities that need a reliable and efficient solution for wastewater treatment. It is also an ideal choice for municipal wastewater recycling systems, ensuring that wastewater can be safely and effectively recycled for future use.

With a one-year warranty, customers can rest assured that this system is made to last. It is a cost-effective and practical solution that can help facilities meet regulatory requirements for wastewater treatment and discharge.

Overall, the Waste Water Treatment System is a top-of-the-line solution for industrial wastewater treatment. It is a reliable and efficient system that can help facilities purify their wastewater and meet regulatory requirements. Whether you need a domestic sewage purification plant or a biochemical sewage treatment facility, this system is an excellent choice.

#### Features:

Product Name: Waste Water Treatment System

Feature: Save Money, Reduce Environmental Impact

Operating Temperature: 5-40

Treatment Process: Physical, Chemical, And Biological Treatment

Warranty: 1 Year

Treatment Stage: Primary, Secondary, And Tertiary Treatment

This Waste Water Treatment System is a great municipal wastewater recycling system, commonly used in sewage treatment plants. Its advanced physical, chemical, and biological treatment processes help save money and reduce environmental impact. The system is designed to operate within a temperature range of 5-40 and comes with a 1-year warranty. It includes primary, secondary, and tertiary treatment stages to ensure effective waste treatment.

#### Technical Parameters:

Capacity	5000 M3/day
Treatment Stage	Primary, Secondary, and Tertiary Treatment
Material	Stainless Steel
Installation	Indoor or Outdoor
Application	Industrial Wastewater Treatment Unit, Water Reclamation System, Domestic Sewage Purification Plant
Warranty	1 Year
Operating Temperature	5-40
Discharge Standard	Complies with Local Environmental Regulations
Feature	Save Money, Reduce Environmental Impact
Treatment Process	Physical, Chemical, and Biological Treatment

#### Applications:

The YPE-4 model can be used in a variety of applications, including sewage treatment plants, municipal wastewater recycling systems, and domestic sewage purification plants. Its machinery test report provides assurance of its reliability and performance, while its wide operating temperature range of 5-40 ensures that it can be used effectively in a range of climatic conditions.

With its advanced treatment processes and efficient design, the KOLON YPE-4 Waste Water Treatment System is well-suited for use in a variety of scenarios. It can be used to treat wastewater from residential areas, commercial buildings, and industrial plants, making it an ideal choice for businesses and organizations that are committed to sustainability and environmental responsibility.

Whether you need to treat sewage in an urban or rural setting, the KOLON YPE-4 Waste Water Treatment System is a reliable and effective solution. Its advanced treatment processes and machinery test report ensure that it can be used with confidence, while its indoor and outdoor installation options make it a versatile choice for a range of applications.

## Customization:

Looking for a reliable and high-quality Chemical Wastewater Treatment Installation? KOLON offers the YPE-4 model, designed and manufactured in Shanghai, China. With a design pressure of  $\leq 0.6\text{Mpa}$ , this system can handle up to 5000 M3/day of Domestic Sewage Purification Plant, making it ideal for commercial or industrial use.

Our product comes with a Machinery Test Report, ensuring its high performance and durability. The system is available in Silver or can be customized to match the customer's request.

Maintenance is easy with our system, making it simple to operate and keep up with. Trust KOLON to provide you with a reliable Chemical Wastewater Treatment Installation that will meet all of your needs.

## Support and Services:

The Waste Water Treatment System product technical support and services include:

24/7 technical support hotline

On-site troubleshooting and repair services

Regular maintenance and inspection services

Training and education on system operation and maintenance

Assistance with system upgrades and retrofits

Access to online resources and documentation

Our team of experienced and knowledgeable technicians are dedicated to providing prompt and reliable support to ensure the optimal performance of your Waste Water Treatment System.

## Packing and Shipping:

Product Packaging:

The Waste Water Treatment System will be securely packed in a durable cardboard box.

The product will be surrounded by protective materials to prevent any damage during shipping.

The box will be labeled with the product name and a warning to handle with care.

Shipping:

The product will be shipped via a reputable courier service.

Shipping costs will be calculated based on the destination and weight of the package.

Customers will be provided with a tracking number to monitor the progress of their shipment.

Delivery times may vary depending on the location of the customer.

## FAQ:

A: The brand name of our Waste Water Treatment System is KOLON.

Q: What is the model number of the Waste Water Treatment System?

A: The model number of our Waste Water Treatment System is YPE-4.

Q: Where is the Waste Water Treatment System manufactured?

A: The Waste Water Treatment System is manufactured in Shanghai, China.

Q: What is the capacity of the Waste Water Treatment System?

A: The capacity of our Waste Water Treatment System is 4 cubic meters per hour.

Q: What type of waste water can be treated by the Waste Water Treatment System?

A: Our Waste Water Treatment System can effectively treat various types of waste water, including industrial and domestic waste water.
