Product Description

Product Description:

The Rollover Car Wash Machine is specifically designed for garage car washes and is equipped with advanced features that make it stand out from other car wash machines. The machine comes with a foam spraying system that ensures a thorough and even application of soap on the car's exterior. The wheel brushing feature helps to get rid of stubborn stains and dirt on the wheels and tires. The undercarriage washing feature ensures that every nook and cranny of the car is cleaned, leaving no dirt or grime behind.

The Rollover Car Wash Machine does not just clean the car; it also dries it using a hot air blower. This ensures that your customers' vehicles are not only clean but also dry, preventing water spots and streaks on the car's exterior. The hot air blower is gentle on the car's paint, ensuring that it does not get damaged during the drying process.

The Rollover Car Wash Machine is designed to be compact and easy to install, making it perfect for any garage size. Its standard size means that it can fit into most garages without taking up too much space. This Roll Over Auto Detailer is also easy to operate, with intuitive controls that make it easy for anyone to use. With the Rollover Car Wash Machine, you can provide your customers with a high-quality car wash experience that will keep them coming back for more.
