## Product Description

### Product Description:

The Touchless Car Wash Machine is ideal for use in car wash tunnel systems, where it can quickly and effectively clean a large number of vehicles in a short amount of time. Its automatic operation and hot water cleaning feature make it a popular choice for car wash businesses that want to provide their customers with a fast, high-quality wash that will leave their vehicles looking like new.

One of the key features of the Touchless Car Wash Machine is its remote control, which allows you to operate the machine from a distance. This means that you can easily control the machine's movement and adjust its settings without having to be near it, making it a convenient and time-saving option for car wash businesses.

The adjustable water pressure feature of this machine is another important attribute. It allows you to customize the water pressure to suit the specific needs of your vehicle, ensuring that it is not damaged during the cleaning process. This is particularly important for vehicles with delicate paint finishes or other sensitive surfaces that may be easily scratched or damaged by high-pressure water jets.

The high-pressure water jet is another key feature of the Touchless Car Wash Machine. It is capable of delivering a powerful blast of water that can easily remove stubborn dirt and grime from your car's surface, leaving it looking clean and shiny. This feature is particularly useful for cleaning the wheels and undercarriage of your vehicle, where dirt and grime tend to accumulate.

The automatic operation of this machine is yet another important attribute. It allows you to start and stop the machine with ease, without having to manually operate any controls. This makes it a convenient and time-saving option for car wash businesses that want to provide their customers with a fast and efficient wash that requires minimal supervision.

Finally, the hot water cleaning feature of the Touchless Car Wash Machine is another important attribute. It allows the machine to deliver a thorough and effective cleaning that is capable of removing even the toughest dirt and grime from your vehicle's surface. This feature is particularly useful for cleaning vehicles that have been exposed to harsh weather conditions or other environmental factors that can cause dirt and grime to become deeply embedded in the surface of the vehicle.

In conclusion, the Touchless Car Wash Machine is an innovative and effective solution for car wash businesses that want to provide their customers with a fast, efficient, and high-quality wash. Its remote control, adjustable water pressure, high-pressure water jet, automatic operation, and hot water cleaning feature make it a versatile and convenient option that is sure to meet the needs of any car wash business.

### Applications:

The KOLON KL-360 plus is perfect for a wide range of product application occasions and scenarios. Here are some of the most common ones:

**Car dealerships:** Car wash tunnel systems are essential for car dealerships to maintain their cars' cleanliness and ensure that their cars look presentable to potential buyers. The KOLON KL-360 plus is an excellent choice for car dealerships because it is automatic and requires minimal human intervention.

**Gas stations:** Gas stations can also benefit from the KOLON KL-360 plus because they can provide their customers with a self-service

automatic car wash machine. This will enable gas stations to increase their revenue streams by providing a convenient service to their customers.

**Car rental agencies:** Car rental agencies can also benefit from the KOLON KL-360 plus because they can ensure that their cars are always clean and presentable to their customers. This is especially important because customers expect rental cars to be clean and well-maintained.

**Car wash businesses:** Car wash businesses can use the KOLON KL-360 plus to provide an automatic touchless car wash experience to their customers. This will enable car wash businesses to increase their efficiency and reduce their labor costs.

**Office parking lots:** Office parking lots can also benefit from the KOLON KL-360 plus because it provides a self-service car wash option for employees. This will enable employees to keep their cars clean without having to go to a car wash business.

The KOLON KL-360 plus has a size of 8\*3.7\*3.4 meters and can be delivered in a carton package. The machine has a supply ability of 10000/month, and the minimum order quantity is one unit. The price of the machine is negotiable, and the delivery time is 20 days. The machine can be paid for using TT/PAYPAL.

### Customization:
