Product Description

Product Description:

This particular bus wash machine is powered by electricity and operates at a frequency of 50Hz. The control system is a PLC, which ensures that the cleaning process is efficient and effective. The machine is equipped with high-pressure nozzles that blast away dirt, grime, and debris from the surface of the bus. The cleaning speed of the machine is 2-3 minutes per car, which means that it can clean a significant number of buses in a short amount of time.

The truck and bus pressure washer is an excellent investment for any transportation company. Not only does it help to keep the buses clean, but it also helps to extend the life of the buses. Dirt and debris can cause damage to the exterior of the bus over time, which can lead to costly repairs. By using the bus wash machine regularly, the chances of damage to the exterior of the bus are reduced.

The water consumption of the bus wash machine is 267L per car. While this may seem like a lot of water, it is actually much less than what would be used if the cleaning were done manually. The high-pressure nozzles ensure that the water is used efficiently, and the cleaning process is completed quickly.

In summary, the bus wash machine is an essential piece of equipment for any transportation company. It is a type of big vehicle washing equipment that is designed to clean large buses and trucks effectively. The machine is powered by electricity and operates at a frequency of 50Hz. The control system is a PLC, which ensures that the cleaning process is efficient and effective. The cleaning speed of the machine is 2-3 minutes per car, and the water consumption is 267L per car.

Features:

Product Name: Bus Wash Machine

Drying Time: 1-2 Minutes

Washing Speed: 5-7 Buses/hour

Washing Time: 3-5mins/car

Control System: PLC

Model: KL-EN1

Keywords: Truck and Bus Pressure Washer, Automatic Bus Cleaning Machine

Technical Parameters:

Technical Parameter	Value
Product Name	Truck and Bus Pressure Washer
Model	KL-EN1
Power	67kw
Frequency	50Hz
Water Pressure	0.3-0.5MPa
Water Consumption	267L/car
Max Washing Length	Unlimited
Washing Time	3-5mins/car
Cleaning Speed	2-3min/car
Drying Time	1-2 Minutes
Safety Features	Emergency Stop Button
Product Name	Truck and Bus Pressure Washer

Applications:

The KOLON KL-D02 Automatic Bus Cleaning Machine is designed for ease of use and convenience. The control system of the machine is operated by a PLC, making it easy to program and operate. The machine is electrically powered, making it energy efficient and environmentally friendly. The frequency of the machine is 50Hz, making it suitable for use in various countries and regions.

The KOLON KL-D02 Automatic Bus Cleaning Machine has a washing speed of 5-7 buses per hour, making it a fast and efficient way to clean municipal buses and other similar vehicles. The water consumption of the machine is 80L per car, making it a water-efficient option for cleaning buses and trucks. This makes it a cost-effective option for businesses looking to reduce their water usage and expenses. The KOLON KL-D02 Automatic Bus Cleaning Machine is perfect for use in various scenarios. It is ideal for use in bus and truck depots, where there is a high volume of vehicles that need to be cleaned regularly. It is also perfect for use in public transportation hubs such as airports, train stations, and bus terminals. The machine can be used by both public and private transportation companies, making it a versatile option for businesses of all sizes.

In conclusion, the KOLON KL-D02 Automatic Bus Cleaning Machine is a reliable and efficient product that can help businesses save time and money. It is a perfect solution for businesses that need to clean a large number of buses and trucks regularly. The machine's fast washing speed, low water consumption, and energy efficiency make it a cost-effective option for businesses looking to reduce their operating expenses. It is a must-have product for any business in the public transportation industry that wants to maintain a clean and professional image.

Customization:

Customize your KOLON KL-D02 Automatic Bus Cleaning Machine with our product customization services! Our bus wash machine is a versatile and reliable equipment designed to provide efficient cleaning for buses and trucks. Made in Shanghai, China, our machine boasts a powerful motor with 67kw power to provide effective cleaning in just 3-5 mins per car.
