Basic Information

- Place of Origin: Shanghai, China
- Brand Name: KOLON
- Model Number: KL-01hw

Product Specification

- Water Pressure: 0.3-0.5MPa
- Frequency: 50Hz
- Washing Speed: 5-7 Buses/hour
- Model: KL-EN1
- Cleaning Speed: 2-3min/car
- Washing Time: 3-5mins/car
- Max Washing Length: Unlimited
- Power: 67kw
- Highlight: 50Hz Municipal Bus Cleaning System

Product Description

Product Description:

One of the key features of this Bus Wash Machine is its water pressure, which ranges from 0.3-0.5MPa. This high-pressure water jet ensures that even the toughest dirt and grime is removed from the surface of the vehicle, leaving it sparkling clean. In addition to its powerful water pressure, this Bus Wash Machine also boasts an impressive water consumption rate of 267L per car. This means that not only is it highly effective at cleaning, but it is also environmentally friendly and cost-efficient. The control system of this Bus Wash Machine is PLC, which means that it is fully automated and easy to use. The operator can simply input the necessary settings and the machine takes care of the rest. With a frequency of 50Hz, this Bus Wash Machine is designed to operate smoothly and efficiently, ensuring that it can handle high volumes of vehicles without any issues. Its cleaning speed is also impressive, with a rate of 2-3 minutes per car, which means that it can clean vehicles quickly and efficiently, without causing any delays or disruptions. Overall, our Bus Wash Machine is a top-of-the-line piece of equipment that is perfect for anyone who needs to clean big vehicles on a regular basis. Its powerful water pressure, cost-efficient water consumption rate, automated control system, and fast cleaning speed make it an ideal choice for commercial and public transportation vehicles.

Features:

Product Name: Automatic Bus Cleaning Machine
Safety Features: Emergency Stop Button
Drying Time: 1-2 Minutes
Washing Speed: 5-7 Buses/hour
Washing Time: 3-5mins/car
Control System: PLC

Technical Parameters:

Power	67kw
Washing Time	3-5mins/car
Water Consumption	267L/car
Frequency	50Hz
Cleaning Speed	2-3min/car
Washing Speed	5-7 Buses/hour
Max Washing Length	Unlimited
Power Source	Electric
Safety Features	Emergency Stop Button
Model	KL-EN1

Applications:

The KL-01hw is a truck and bus pressure washer that can clean up to 5-7 buses per hour. The machine uses an electric power source, making it an eco-friendly cleaning solution. The machine's water consumption is 267L per car, making it an efficient cleaning option. The KL-EN1 model is designed to clean buses quickly and efficiently, with a washing time of 3-5 minutes per car. The machine is perfect for bus companies that need to clean their fleet quickly and get them back on the road. The KL-01hw is ideal for use in various scenarios, such as bus stations, trucking depots, and maintenance facilities. The machine is also perfect for use by bus companies and transportation providers that have a large fleet of buses that need to be cleaned regularly. In summary, KOLON's KL-01hw is an effective and efficient automatic bus cleaning machine that is perfect for cleaning big vehicles. Its high washing speed, electric power source, and low water consumption make it an eco-friendly and cost-effective cleaning solution for bus companies and transportation providers.

Customization:

Originating from Shanghai, China, this powerful machine can wash any length of bus with a max speed of 5-7 buses per hour. Equipped with an emergency stop button, safety is a top priority. Powered by electricity, the KOLON KL-01hw has a water consumption of 80L per car. Make the most out of your Municipal Bus Cleaning System with KOLON's product customization services.

Support and Services:

The Bus Wash Machine product technical support team is dedicated to providing our customers with the highest level of service and expertise.
