Product Description

Product Description:

One of the most notable features of this machine is its quick washing time. With a washing time of just 3-5 minutes per car, this machine can handle a high volume of vehicles efficiently. This is especially useful for commercial businesses that require a quick turnaround time in order to maximize productivity.

The Big Vehicle Washing Equipment operates at a frequency of 50Hz, ensuring that it is compatible with most power grids. This means that it can be used in a variety of locations with ease. Additionally, the machine consumes just 80L of water per car, making it an environmentally-friendly option for businesses that want to reduce their water usage.

Another great feature of the Big Vehicle Washing Equipment is its fast drying time. With a drying time of just 1-2 minutes, this machine can quickly dry the surface of the vehicle, leaving it looking shiny and clean. This is especially important for businesses that want to maintain a professional appearance and provide their customers with a high-quality service.

Despite its powerful capabilities, the Big Vehicle Washing Equipment is designed to be user-friendly and easy to operate. Its intuitive controls allow users to easily adjust the settings and customize the wash cycle to suit their needs. Additionally, the machine consumes just 267L of water per car, making it an efficient and cost-effective option for businesses that want to minimize their water bills.

Overall, the Big Vehicle Washing Equipment is a highly efficient and effective machine that is perfect for businesses that need to wash multiple big vehicles on a regular basis. Its advanced features, quick washing time, and user-friendly controls make it a top choice for commercial use. So why wait? Invest in the Big Vehicle Washing Equipment today and take your business to the next level!

Features:

- Product Name: Bus Wash Machine
- Power Source: Electric
- Water Consumption: 267L/car
- Washing Time: 3-5mins/car
- Washing Speed: 5-7 Buses/hour
- Drying Time: 1-2 Minutes

This is an **Automatic Bus Cleaning Machine** designed for **Municipal Bus Cleaning System**. It uses electric power and consumes 267L of water per car. The washing time per car is 3-5 minutes, and it can wash 5-7 buses per hour. The drying time is 1-2 minutes.

Technical Parameters:

Max Washing Length	Unlimited
Control System	PLC
Washing Time	3-5mins/car
Power	30kw
Water Consumption	267L/car
Power Source	Electric
Frequency	50Hz
Washing Speed	5-7 Buses/hour
Water Consumption	80L/car
Model	KL-BUS1

Applications:

One of the most significant advantages of the KL-BS1 is its high washing and cleaning speed. The machine can wash up to 5-7 buses per hour, with a cleaning speed of 2-3 minutes per car. This makes it an excellent choice for busy bus terminals and depots.

The KL-BS1 is also designed with safety in mind. The emergency stop button ensures that the machine can be shut down quickly in case of an emergency, protecting both the bus and the operator.

There are many different occasions and scenarios where the KL-BS1 Bus Wash Machine would be an excellent choice. For example:

- City bus terminals that need to clean large numbers of buses quickly and efficiently
- Bus depots that want to keep their buses looking clean and new
- Commercial bus companies that need to maintain a professional appearance for their vehicles
- Large-scale transportation systems, such as airports, that need to keep their buses clean for passengers

The KL-BS1 is made in Shanghai, China, and is built to the highest standards of quality and durability. It is an investment that will pay off for years to come, providing reliable and efficient cleaning for your bus fleet.

Customization:
